OUTLOOK

Macroeconomic data was poor, especially in Germany and China; US-China trade talks meandered; and US bond yields fell dramatically. These factors renewed concerns about global growth, and markets stabilised; the Fund's benchmark index edged lower (-0.12%) in the month.

The Fund beat the index, returning +2.17%. Splitit Payments continued to surge, closing the month at \$1.27, up 45.9%. We exited some of our holding above \$1.90 and again around \$1.50, but maintain a significant position. Jumbo Interactive rose 23% and the market continues to re-rate the business into early April. Clover Corporation is the global market leader in the supply of Omega-3 fatty acids to manufacturers of Infant Milk Formula. Regulators in Europe have increased minimum content levels, with the potential for similar changes in China and the United States. The stock reported a very encouraging result and was up 16%.

Our worst performer was St Barbara Limited, which fell 30% following submission of a Feasibility Study which reported much higher than expected expansion costs.
